Company Profile

wolfSSL provides lightweight, high-performance cryptography and secure communications tailored for defense and aerospace systems. Trusted by every branch of the U.S. military, our solutions include the FIPS 140-3 validated wolfCrypt library and DO-178C DAL A-compliant offerings. We offer advanced support for (D)TLS 1.3, post-quantum cryptography (PQC) in line with CNSA 2.0, and secure protocols like SSH and MQTT. Whether you're building secure communications for tactical networks, encrypting satellite links, or hardening embedded systems in harsh environments, wolfSSL delivers the compact, certifiable, and modern cryptographic solutions you need. Stop by to learn how our products support mission-critical security with unmatched speed and portability.

Industry Category

- Secure Communications & Tactical Radios
- Cybersecurity & Threat Detection
- Satellite & Space-Based Technologies
- Defence-Grade Software & Hardware Solutions

Brands and Services

- wolfSSL
- wolfCrypt
- wolfCrypt FIPS
- wolfHSM
- wolfTPM
- wolfMQTT
- wolfSSH
- wolfBoot
- wolfSentry
- curl
