

Understanding the benefits of trees to guide future tree planting

Luke Dawson, National Operations Manager, ArborSafe Australia Pty Ltd

This presentation will look at the direct and indirect benefits of trees in the urban environment and how these should be considered when planning tree planting at your site.

BIO

Luke Dawson is an AQF Level 5 consulting arborist who has worked for ArborSafe since 2015 and is currently their National Operations Manager.

He trained as an arborist in England before coming to Australia in 2007. During his time here, Luke has worked in a range of Arb related roles in local government, operations management and consultancy. His current role includes account management, dealing with clients, quoting, as well as tree assessment and reporting.

He now lives on the Mornington Peninsula with his wife and three kids, where he enjoys spending time surfing and keeping fit.
