Using Technology in the Teaching Space for Remote Support, Collaboration, Future Design, & AR

Nathan Gardiner
University of Canterbury

Abstract:

Bio:
In his role as Audio Visual Architect at the University of Canterbury, New Zealand, Nathan is responsible for the design and implementation of all teaching and learning technology installed across campus. Nathan is keenly involved in the development of strategic integration of new and emerging teaching technologies at UC. He is currently also a committee board member of the association for Audiovisual & Education Technology Management (aetm.org).
