

Dr Lydia Park

I have completed my undergraduate study (MBChB) at University of Otago and have worked in both Auckland and Wellington regions, current working as a Non-SET Plastic Surgery Registrar at Hutt Hospital. Being exposed to a variety of conditions and experiences in two major Plastic Surgery units have lead me to develop a special interest in craniofacial conditions and vascular anomalies. With my additional interest in research and public health programs, I hope to contribute to both fields through training in both Plastic Surgery and Public Health.
