

# Friday 18 September

|             |                                                               |
|-------------|---------------------------------------------------------------|
| 0830        | Registrar Training Morning<br><b>Mick O'Halloran</b>          |
| 0930        | POP<br><b>Amanda Chung - Guest Presenter</b>                  |
| 1030        | <b>Morning Refreshments</b>   <i>Industry Exhibition Area</i> |
| 1100        | LUTS<br><b>Devang Desai - Guest Presenter</b>                 |
| 1200 - 1300 | <b>Lunch</b>   <i>Industry Exhibition Area</i>                |

## Scientific Session 1 Chairs | Steve McCombie & Mick O'Halloran

---

|      |     |                                                                                                                                                                                                               |
|------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1300 |     | Welcome<br><b>Jennifer Kong</b>                                                                                                                                                                               |
| 1310 | 1.1 | Breaking New Ground: Implementation and Early Outcomes of Western Australia's First Nurse-Led Local Anaesthetic Transperineal Prostate Biopsy Service<br><b>Vivien Hsu</b>                                    |
| 1320 | 1.2 | Stones and Stepping Stones: Percutaneous Nephrolithotomy Outcomes in a Single Centre and the Educational Bottleneck for Trainees<br><b>Mohammed Al-Zubaidi</b>                                                |
| 1330 | 1.3 | Outcomes using standardised sling and sling suture length in autologous pubovaginal sling urethropexy<br><b>Muireann Hickey</b>                                                                               |
| 1340 | 1.4 | Short versus Extended Antibiotic Prophylaxis After Cystectomy: A 10-Year Retrospective Analysis<br><b>Sam McDonald</b>                                                                                        |
| 1350 | 1.5 | Vesico-Vaginal Fistula Repair: Patient Selection, Surgical Approach and Technique<br><b>Amanda Chung - Guest Presenter</b>                                                                                    |
| 1410 | 1.6 | Urethra and prostate cancer- case series<br><b>Devang Desai - Guest Presenter</b>                                                                                                                             |
| 1430 | 1.7 | G-DISCO: Safety, feasibility, tolerability and early efficacy of synchronous intravesical gemcitabine–docetaxel in high-risk non-muscle-invasive bladder cancer- a first in human study<br><b>Kevin Keane</b> |

|             |     |                                                                                                           |
|-------------|-----|-----------------------------------------------------------------------------------------------------------|
| 1440        | 1.8 | Critical Appraisal - Perioperative Apalutamide in High-Risk Localised Prostate Cancer<br><b>Ivan Thia</b> |
| 1450        | 1.9 | Risk of UTI/Urosepsis Post Flexible Cystoscopy<br><b>Zachary Thompson</b>                                 |
| 1500 - 1530 |     | <b>Afternoon Refreshments</b>   <i>Exhibition Area</i>                                                    |

**Scientific Session 2**  
**Chair** | Justin Vivian & Mikhail Lozinskiy

---

|      |     |                                                                                            |
|------|-----|--------------------------------------------------------------------------------------------|
| 1530 | 2.1 | An update on PAE in WA<br><b>Will Ormiston</b>                                             |
| 1550 |     | Introduction to panel                                                                      |
| 1600 | 2.2 | Oligometastatic pca- zap it, cut it, melt it<br><b>Suki Gill, Tom Shannon, Brendon Lau</b> |
| 1630 | 2.3 | PRC Quiz<br><b>Martin Marshall</b>                                                         |

## Saturday 19 September

0830 - 0930 USANZ WA Business Meeting

**Scientific Session 3**  
**Chairs** | Tanya Ha & Jeff Thavaseelan

---

|             |     |                                                                                                        |
|-------------|-----|--------------------------------------------------------------------------------------------------------|
| 0930        | 3.1 | Food for thought: evolving concepts from the world of pathology<br><b>Nicole Swarbrick</b>             |
| 0950        | 3.2 | Sacral Neuromodulation: Implanting Precisely, Choosing Wisely<br><b>Amanda Chung - Guest Presenter</b> |
| 1010        | 3.3 | The Leaking Patient After Radical Prostatectomy: What Next?<br><b>Amanda Chung - Guest Presenter</b>   |
| 1030 - 1100 |     | <b>Morning Refreshments</b>   <i>Exhibition Area</i>                                                   |

**Scientific Session 4**  
**Chairs | James Chen & Sunny Lee**

---

|             |     |                                                                                                                                                         |
|-------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1100        | 4.1 | Bladder neck contracture, VUAS, ureteric stricture management<br><b>Devang Desai - Guest Presenter</b>                                                  |
| 1120        | 4.2 | UroCuff Implementation for HoLEP Patients: A Prospective Audit of Pressure–Flow Transitions and Surgical Outcomes<br><b>Ashley Lee</b>                  |
| 1130        | 4.3 | Anterior urethral stricture- real world data for Optilume<br><b>Devang Desai - Guest Presenter</b>                                                      |
| 1140        | 4.4 | PSMA PET for staging of intermediate-risk prostate cancer - a waste of time and money?<br><b>Katherine Ong</b>                                          |
| 1150        | 4.5 | Warm ischaemia times and renal functional outcomes following robotic partial nephrectomy: A 10 year single-surgeon experience<br><b>Taneika Bosveld</b> |
| 1200        | 4.6 | Training updates from the BOU<br><b>Kara McDermott</b>                                                                                                  |
| 1215        |     | Tony Low Oration<br><b>Helen Street</b>                                                                                                                 |
| 1300 - 1400 |     | <b>Lunch   Exhibition Area</b>                                                                                                                          |

**Scientific Session 5**  
**Chairs | Kara McDermott & Sarah O'Neill**  
**Judge | Amanda Chung & Ding Guo**

---

|      |     |                                                                                                                                                                                                                   |
|------|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1400 | 5.1 | Introduction                                                                                                                                                                                                      |
| 1405 | 5.2 | Surveillance Flexible Cystoscopy in Spinal Cord–Injured Patients with Long-Term Catheterisation: Diagnostic Yield, Histopathological Outcomes and Service Redesign — a Single-Centre Audit<br><b>Anthony Ryan</b> |
| 1415 | 5.3 | A Retrospective Observational Study of a Cxbladder Triage-Based Haematuria Pathway in Nelson Hospital, New Zealand<br><b>Donniel De Leon</b>                                                                      |
| 1425 | 5.4 | Clinical utility of perineal nerve block for transperineal prostate biopsy under general anaesthesia: A real-world audit<br><b>Bryce Stewart</b>                                                                  |

|             |     |                                                                                                                                                                                                                                      |
|-------------|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1435        | 5.5 | Use and diagnostic accuracy of Ga-PSMA PET/CT for preoperative Nodal Staging in localised high risk prostate cancer: A review of current guidelines and audit of imaging versus Pelvic Lymph Node Histology<br><b>Mitchell Barns</b> |
| 1445        | 5.6 | Artificial Intelligence-Assisted Interpretation of Urodynamic Traces: A Blinded Diagnostic Agreement Study<br><b>Sam McDonald</b>                                                                                                    |
| 1455        | 5.7 | Preoperative urine cultures poorly predict causative organisms in urosepsis following endoscopic urological procedures<br><b>Emma Powell</b>                                                                                         |
| 1505        | 5.8 | The STRESSED Study: Heart Rate and Heart Rate Variability as Candidate Biomarkers of Operative Experience<br><b>Matthew Chau</b>                                                                                                     |
| 1515 - 1545 |     | <b>Afternoon Refreshments   Exhibition Area</b>                                                                                                                                                                                      |

#### **Scientific Session 6**

**Chairs |** Alarick Picardo & Yuigi Yuminaga

**Judges |** Devang Desai & Jerard Ghossein

---

|      |     |                                                                                                                                                                                                                                                      |
|------|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1545 | 6.1 | Australia's' First Trial of Feasibility, Usability, Safety, and Acceptability of Transurethral Laser Ablation (TULA) for Outpatient Management of Non-Muscle Invasive Bladder Cancer at Royal Perth Hospital Urology Department<br><b>Ashley Lee</b> |
| 1555 | 6.2 | Single surgeon experience managing localised prostate cancer with minimally invasive focal therapy<br><b>Filip Vujovic</b>                                                                                                                           |
| 1605 | 6.3 | ECIRS versus PCNL in the Elderly: Is Two Better Than One?<br><b>Vivien Hsu</b>                                                                                                                                                                       |
| 1615 | 6.4 | Nephrostomy-related emergency department presentations: a high-burden cohort<br><b>Sophie Fang Lin</b>                                                                                                                                               |
| 1625 | 6.5 | Outcomes of Percutaneous Nephrolithotomy in Elderly Patients: A Retrospective Audit<br><b>Sascha Coates</b>                                                                                                                                          |
