

OPTIONAL WORKSHOPS - PRE-REGISTRATION REQUIRED

Separate cost to attend, not included in registration fee.

1000-1300

Virtual session

Preparing for Academic Peer Review: what do reviewers look for?

Dr Cate McIntosh

This research-oriented workshop is for authors interested in improving their scientific writing. The 3-hour workshop will explain what reviewers look for when examining a manuscript submitted to a journal. It will suggest how to do justice to the hard work of designing and conducting a study by describing your research in a way that engages the audience to find out more. The workshop is suitable for anyone interested in improving the quality of their academic writing whether submitting a manuscript for publication in a peer reviewed journal, or an abstract to a conference. It will also suit anyone interested in contributing to the process of peer review by serving as a reviewer. The workshop is suitable for a range of skill levels. Participants will have the opportunity to practice reviewing and re-crafting a simulated manuscript. At the end of the workshop, you will be able to:

1. Identify potentially suitable target journals for your work
2. Describe the pathway for becoming a peer reviewer
3. Identify strengths and weaknesses of manuscripts that result in acceptance or rejection

Requirements: stable, high speed internet, own computer/laptop with camera and headset, quiet location.

0800-1130

ANZCA Major Haemorrhage

ANZCA CPD EMERGENCY RESPONSE SERIES

Hunter New England Simulation Centre, John Hunter Hospital

Location: HNE Simulation Centre

Suitable for: Anaesthesia trainees IT and above, Anaesthesia consultants, GP anaesthetists, GP anaesthesia trainees, Anaesthesia nurses, Anaesthesia technicians, Recovery nursing staff

Aim: To prepare anaesthesia providers for managing a MH

Outline: Using a combination of skills stations, facilitated discussions and scenario based learning, participants will develop and practise the skills, knowledge and attitudes required to recognise and manage MH and the complications that arise including cardiovascular instability and coagulopathy. The session will satisfy the ANZCA CPD program requirements for Major Haemorrhage. This course promotes a team-based approach and anaesthesia assistants are encouraged to attend with their medical colleagues.

To enrol in the above course, contact the HNE Simulation Centre:

HNE Simulation Centre, Level 1, Royal Newcastle Centre, Lookout Road, New Lambton NSW 2305

Phone: (02) 4921 4268

Email: HNELHD-SC@health.nsw.gov.au

Website: www.hnehealth.nsw.gov.au/professionals/simulation-centre

1200-1530

Can't Intubate, Can't Oxygenate (CICO)

ANZCA CPD EMERGENCY RESPONSE SERIES

Hunter New England Simulation Centre, John Hunter Hospital

Location: HNE Simulation Centre

Suitable for: Anaesthesia trainees IT and above, Anaesthesia consultants, GP anaesthetists, GP anaesthesia trainees, Anaesthesia nurses, Anaesthesia technicians, Recovery nursing staff

Aim: To prepare anaesthesia providers for managing a CICO crisis

Modules: Using a combination of skills stations, facilitated by discussions and scenario based learning, participants will develop and practise the skills, knowledge and attitudes required to recognise and manage the CICO crisis.

Content: 1) Review of available CICO guidelines 2) Decision making and recognition of the CICO crisis 3) Team response to CICO 4) Tips & techniques for performing needle cricothyroidotomy and surgical airway

To enrol in the above course, contact the HNE Simulation Centre:

HNE Simulation Centre, Level 1, Royal Newcastle Centre, Lookout Road, New Lambton NSW 2305

Phone: (02) 4921 4268

Email: HNELHD-SC@health.nsw.gov.au

Website: www.hnehealth.nsw.gov.au/professionals/simulation-centre

ONSITE PBL's & OPTIONAL WORKSHOP - PRE-REGISTRATION REQUIRED

PBL's are included in registration fee, offsite workshop is an additional fee. Both are booked during registration.

NOAH'S ON THE BEACH

Problem Based Learning (PBL) Sessions

Fee: Included in conference registration, booking was once during registration. For any changes, please see registration desk.

The pregnant trauma patient | Harbourview Room

Facilitators: Dr Tom Walker & Dr Brad Sheridan

Discussion of key concepts and considerations in the management of the pregnant patient requiring emergency care and surgery.

Lung Ultrasound | Boardroom

Facilitator: Dr Sam Vidler and Dr Sam Phillips

Ready to upgrade from the 100+ year old stethoscope to a 2020s Point of Care Ultrasound for that crashing patient in your anaesthetic care? Learn some of the diagnostic skills (pneumothorax, interstitial oedema, pleural fluid) and options for monitoring therapy within lung ultrasound.

Planning a meaningful audit/Practical Research session | Boardroom

Facilitator: Dr Rebecca Scott

Targeted at anaesthetic trainees and those new to the audit process, this session is designed to demystify the scholar role activity, and provide a framework for clinical audit as a tool for continuous quality improvement.

To TEG or not to TEG, that is the question | Harbourview Room

Facilitator: Dr Ben Piper

Tired of not knowing why your patient is bleeding? Is apportioning blame to the surgeon not getting you the results you need? Is throwing all blood products indiscriminately based on 50 year old empiric n=12 adults data not doing it for you anymore? There is another way- come and learn some Viscoelastic testing go to moves => The What, When and How to make sense of the wiggly lines through a game called- "Clotty- or -Notty".

Thoracics for the occasional anaesthetist | Pacific Room

Facilitator: Dr Bernard McClement

The night is full of terrors: Balrogs, Vampires... and even double lumen tubes. If you'd like to learn to extinguish flaming beasts with little more than a pinch of SodaBic and a thimble of vinegar, stake an Undead Heart with little more than a shoelace and a rusty paperclip, or insert a DLT through a sea of snot, then join us for "Thoracic Anaesthesia for the Occasional Thoracic Anaesthetist: Demystifying the Double Lumen Endotracheal Tube and Other Horrors." Go home with a goody bag of tips and tricks to ease your passage through those terrifying VATS pleurodeses, decortications and biopsies. Featuring Bonus material: How To Train Your Thoracic Surgeon.

Hot air debrief: Critical Incident debriefing | Pacific Room

Facilitators: Dr Claire Wohlfahrt, Roslyn Sklavos & Annika Schryver

In all medical specialties there are moments of stress or trauma that require a response. How we respond in these times of need can make an immense difference in the way we process and build upon these experiences. The Acute Incident Response (AIR) program provides usable tools that can support anyone wishing to refine their responses to traumatic events in the workplace. This session will discuss the theory and practical application of the tools from a variety of clinical backgrounds.

JOHN HUNTER HOSPITAL RNC CR1

OFFSITE WORKSHOP

Regional Analgesia Techniques in Trauma – Reducing Reliance on the PCA Workshop

Dr Mark Davies, Dr Tim Webb & Dr Vivian Ho

The focus of this hands-on workshop will be on regional anaesthesia techniques for truncal and limb trauma. We will cover essential blocks including chest wall blocks, brachial plexus, fascia iliaca and popliteal sciatic blocks. Single shot and catheter techniques will be discussed. Additional blocks will be shown on request to meet participants' specific learning needs. Limited places available to ensure individualised guidance.

if you need to change any preferences, please see registration desk in foyer for availability
