

# Improving member experience and outcomes through technology

## Netsmart EVV for Health Plans

A comprehensive suite of solutions that seamlessly integrates within existing infrastructure. As a focused leader in electronic visit verification (EVV) compliance, Netsmart EVV strengthens the bridge between states, managed care organizations and providers. We ensure prospective analysis of data pre-claim submission to increase quality and reimbursement, creating visibility for payer management. Netsmart EVV is HITRUST CFS certified, complies with the 21st Century Cures Act and serves as the state aggregator for four states: Nebraska, Florida, Georgia and Kentucky.

### Key benefits

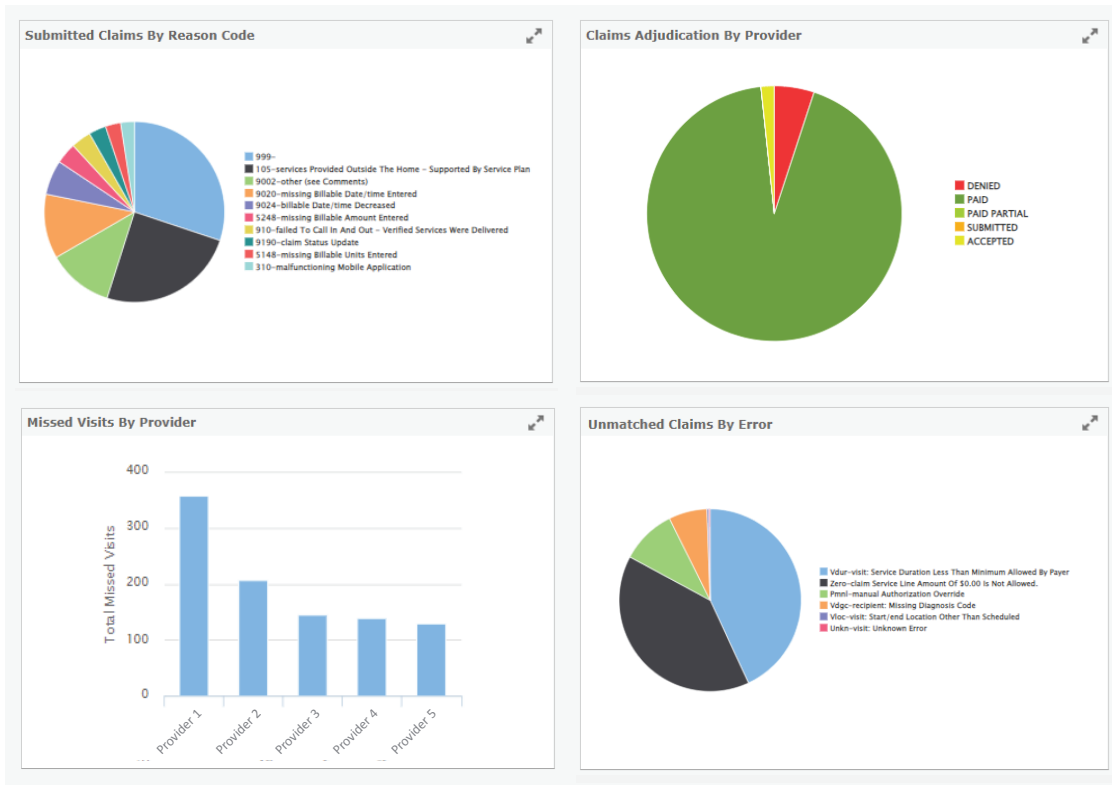

- Reduces fraud, waste and abuse with real-time insights into prior authorization use and provider performance
- Improves member experience and outcomes by holding providers accountable to deliver all authorized services
- Facilitate cost savings for providers with improved efficiencies and reduced paperwork
- Experience and expertise with state, MCO and provider implementations
- Comprehensive, modular platform that easily integrates with existing infrastructure

### Key features

- Sophisticated and flexible business rules engine efficiently drives insights across a complex network
- Aggregates data from all providers, regardless of EVV vendor, with over 80 integrations in place to date
- EVV claims engine handles visit verification, pre-claim review, claims submission and reconciliation
- Manage data, analytics and reports in real-time with the payer dashboard
- Creates transparency and accountability across provider networks via a single centralized solution
- Enables compliance of the 21st Century Cures Act EVV reporting requirements
- Optimizes care delivery and reporting with an easy-to-use mobile application

## Payer Dashboard

Identification of prior authorizations used, billed and verified broken down by provider.
