

# DATA ANALYTICS + ACTIONABLE TOOLS FOR HEALTH AND HUMAN SERVICES

---

**WE FUSE ALL YOUR DATA TO:**  
**MAKE BEST-CARE DECISIONS**  
**DRIVE ACTION & OUTCOMES**  
**PREVENT ADVERSE EVENTS**

# THE ONLY UNREPORTED INCIDENT LIFECYCLE SYSTEM

Incident reports are important but they shouldn't be the only information that catalyzes oversight. From detecting unreported incidents to triage, resolution, and provider outreach, Aura is the only product on the market that gives state oversight agencies the access, insight, and control they need throughout the entire incident & event lifecycle.

This includes automated intelligence about incidents that haven't been reported, those that have been misreported, and **even those that haven't happened yet**.

By leveraging multi-source data, Aura gives you the whole story with historical context to help avoid preventable incidents and dramatically improve care and care delivery systems. Once state agencies implement Aura, they see a rapid decline in all incidents - unreported and reported.

## FLEXIBLE DEPLOYMENT MODELS

Aura works with (or without) any incident management system.

HOME GROWN  
THIRD-PARTY  
PULSELIGHT

## MANAGE AND PREVENT INCIDENTS

AUTOMATICALLY DETECT UNREPORTED INCIDENTS/ ANE THROUGH FUSED CLAIMS AND OTHER DATA.

HELP PREVENT FUTURE INCIDENTS WITH TARGETED ONE-CLICK ANALYTICS AND REPORTS.

WORKFLOW TOOLS FOR TRIAGE, INVESTIGATION, PROVIDER OUTREACH, AND RESOLUTION.

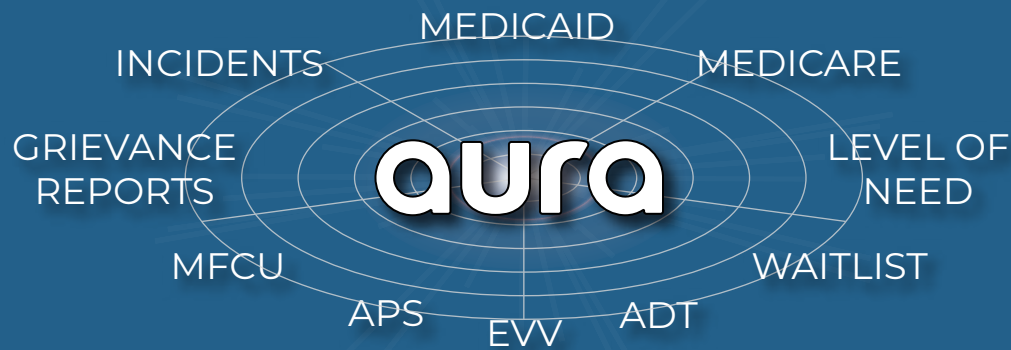

**Close the loop on critical incidents.** Aura integrates with any IMS and leverages its fused data platform to automatically detect unreported incidents. Robust analytic tools offer person-centric triage and investigation for all types of incidents, adverse events, or potential ANE. Users can connect with stakeholders (providers, case managers, individuals) directly from within Aura to take action.

# THE POWER OF DATA FUSED AND BROUGHT TO LIFE

Pulselight automatically fuses data from multiple sources in our proprietary analytics engine, empowering users to discover trends, patterns, and answers about individuals, providers, and programs. Aura enables states to meet CMS' guidance to securely share information across relevant agencies.

*\*Example data sources are optional and not exhaustive.*

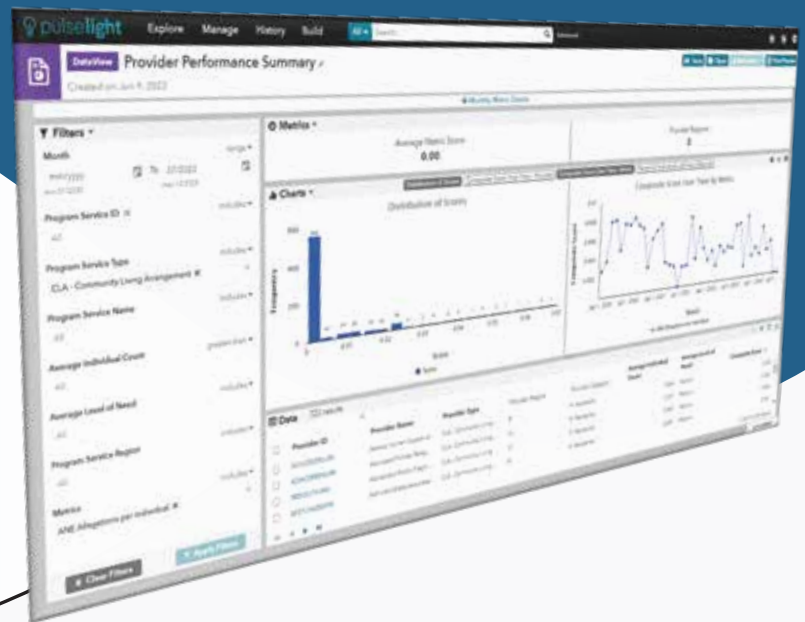

## GET RESULTS AND OUTCOMES

GENERATE INSTANT REPORTS FOR MEDICAID DIRECTORS AND CMS.

COMPLY WITH FEDERAL REGULATIONS (INCLUDING THE ACCESS RULE) AND AUDITS.

PREVENT ADVERSE EVENTS BEFORE THEY HAPPEN WITH AUTOMATION, VISIBILITY, AND INTEROPERABILITY.

OPTIMIZE STAFF RESOURCES BY SAVING THOUSANDS OF HOURS ON TASKS.

## IMPROVE ACCESS AND EQUITY

REVIEW AGGREGATED INFORMATION TO ENSURE TIMELY ASSESSMENTS.

ANALYZE, MEASURE, AND REPORT ON SERVICES AUTHORIZED VS. RENDERED WITH EVV DATA.

SURFACE ASPECTS OF YOUR SYSTEM WITH POTENTIAL HEALTH EQUITY DISPARITIES, AND QUANTIFY IMPACT.

## ENHANCE CARE AND QUALITY

IN ONE PLACE, SEE ENTIRE MEDICAL HISTORIES OF INDIVIDUALS FOR OUTREACH, PREVENTION, AND TARGETED CARE PLANS.

COMPARE PROVIDER PERFORMANCE FOR QUALITY AND VALUE-BASED PAYMENTS.

TREND AND ANALYZE PATTERNS OF ADVERSE EVENTS AND INDICATORS OF POTENTIAL ANE.

UNCOVER POLYPHARMIC AND PSYCHOTROPIC DRUG TRENDS AND THEIR IMPACTS ON INDIVIDUALS.

# PUT THE PERSON AT THE CENTER OF EVERY STORY

**Aura** is the only product that automatically ingests claims and other data to give you answers, insights, and actionable tools to **meet the Access Rule's data-driven requirements.**

With powerful algorithms, automation, and workflow efficiencies, Aura helps you and your team measure, report, and act on person-centered care, service quality & access, health equity, and incident/ ANE detection, management & prevention.

Aura improves outcomes for individuals while providing transparency and accountability for providers and systems.

“

*“A game-changer.  
Ridiculously powerful.  
Will simply save lives and money.”*
