

REMOUNTS

WHAT IS A REMOUNT?

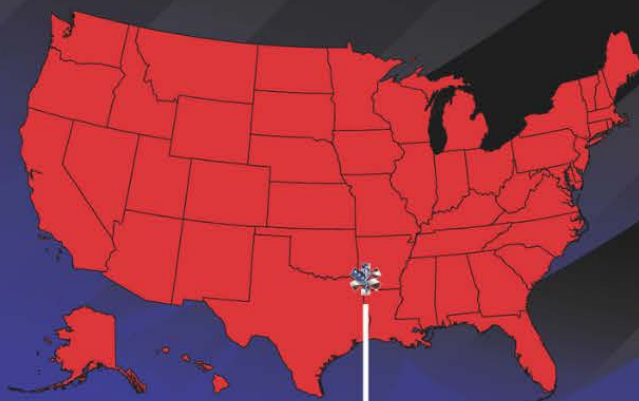

A Remount is when a qualified company removes an ambulance module from a wrecked or well-worn chassis and mounts the module onto a new chassis.

ASV specializes in the Remount & Refurbishing of all varieties of ambulances. This includes and is not limited to Remount body work, graphics, electrical upgrades, flooring, cabinet repair, modifications, LED lighting, & many more options. We will strive to provide you with affordable & quality options to your fleet!

OUR OPERATIONS ARE **CERTIFIED & COMPLIANT**

- Remounts are CAAS Certified
- Type II Transits are KKK 1822-F Certified
- Strict compliance to FMVSS, AMD, DOT, & state regulations.

American Specialty **ACROSS THE COUNTRY!**

TRANSITS

WHAT IS A TRANSIT?

Our Type II Transit vehicles are van-style ambulances that are built on the chassis of either a Ford Transit or Ram Promaster. They are often used by hospitals & health organizations to transport patients who need basic life support, but can be used on 911 calls.

Our state-of-the-art ambulance conversions are designed to be adaptable to the demanding requirements of the emergency services. Our Type II ambulance(s) will provide years of low-cost performance & easy maintenance.
