Conference Day 1 - Thursday May 29, 2025
11:00 – 12:00pm

THREE SESSIONS TO CHOOSE FROM:

SESSION D: Teaching Behaviors that Empower Students

This session will introduce empowering teaching behaviors that facilitate student engagement and learning. The session will explore themes of establishing rapport and trust, activating student interest in content, and encouraging resiliency and self-advocacy. The connection between empowering students during the nursing program and future preparedness as empowered nursing professionals will be explored.

Faculty: Theresa Puckhaber, Ed.D, CNE, PMHNP-BC, AGCNS-BC, APRN

SESSION E: Integrating Informatics Principles for Clinical Nurse Educators

Data and technology in healthcare are evolving at an unprecedented speed and nurses interact with both in their daily work. Informatics is more than data entry into an electronic health record. It is how we translate the data into knowledge and wisdom. Informaticists examine a variety of technologies to determine benefit to patient outcomes and ideally to reduce the cognitive burden on clinicians. There is rarely an instance of clinical education that does not require a data component, and Clinical nurse educators are faced with the challenge of providing instruction to a diverse population of nurses in the same session who may be tech experts or tech naïve. Understanding how the basics principles of informatics relate into education, will set both the educator and learner up for success.

Faculty: Kathleen Meyer, DNP, MSN, RN, CPHIMS, LSSBB

SESSION F: Bringing LPNs back to Acute Care—Maximizing Practice within License

DESCRIPTION COMING SOON

Faculty: Julianne Taylor MSN, RN, NPD-BC
