

# JANX

## Pipeline Integrity Services

*"People-Focused, Trust-Driven, Reliability-Guaranteed – That's JANX."*

### Why choose JANX?

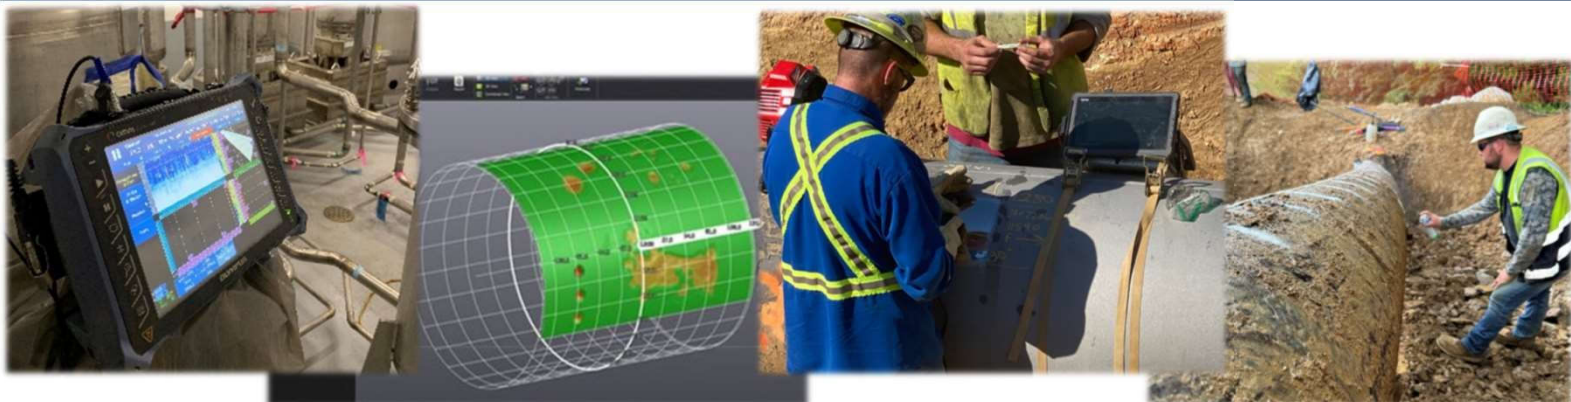

Choose JANX for your pipeline integrity needs and benefit from our technology and expert solutions. Our pipeline integrity program utilizes advanced tools such as Creaform 3D laser scanning, advanced phased array sizing methods with FMC/TFM, EddyFi's PEC Lyft system, and MMT's cutting-edge HSD Tester, ensuring precision and reliability.

Our commitment to quality and innovation guarantees accurate assessments and effective maintenance strategies. With JANX, you get tailored, sustainable solutions that prioritize safety and environmental responsibility, enhancing the longevity and efficiency of your infrastructure.

Choose JANX for our expertise, customer focus, and advanced technology, ensuring superior pipeline integrity and reliability.

### Our Services

- **3D Laser Scanning** for External Corrosion / Mechanical Damage
- **CMAP Scanning** for Internal Corrosion
- **UT Straight Beam Testing**
- **UT Shear Wave Testing**
- **UT Phased Array** Encoded Scanning
- **Soil Testing / CP Measurements**
- **Hardness Testing**
- **Material Verification** with the MMT HSD Tool
- **PEC Testing** with the EddyFi Lyft
- **Magnetic Particle Testing**
- **Certified Welding Inspectors**
- JANX has technicians certified through **API QUTE, API QUTE-TM, and ASNT ISQ UTT**
