

# computrition

## ENTERPRISE

Our healthcare-focused products provide supply chains with beginning-to-end automation to ensure unified operations with stronger data and workflows.

## EXPERTISE

Founded by a dietitian, nutrition remains in the DNA of our company. Over 65% of our employees have experience in key areas of foodservice across industries like healthcare and military.

## EXCELLENCE

Our products are constantly evolving to provide improved mobile options, aiming to anticipate demand and to enhance user experience.

## OUR MISSION

“

Computrition is committed to **Hospitality Enterprise Resource Optimization (HERO)**, an enterprise software product category that leverages automation and mobile capabilities to help ensure dollars invested in food and nutrition services, and resources allocated, have the most optimized financial result.

# COMPUTRITION OFFERINGS

EFFICIENCY. SATISFACTION. SAFETY. SAVINGS.

*at your fingertips*

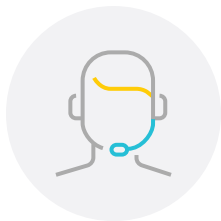

## HS onTray

Offer patients the comfort and convenience of using their own mobile devices to place meal orders. Ease the burden on staff while empowering patients to make their own informed selections.

## DataArc

Extract, transform, and load data to an enterprise data warehouse via our software engine. Conduct thorough reporting and obtain analytics to forecast, budget, and determine KPIs. Identify areas for improvement and implement positive change.

## Room Service Connect+

Simplify your room service program by taking on-demand patient or guest meal orders from a call center. Elevate the patient and guest experience by taking meal orders at the bedside with a tablet.

## Tray InMotion Elite

Effectively track the entire tray delivery process and ensure patient safety and satisfaction via wristband scanning. A web-based dashboard provides real-time reporting to meet standard delivery times, improve daily workflow, and boost employee productivity!

## SPOON

Enhance retail operations with online ordering and dynamic management of employee accounts like payroll deduct, declining balances, and gift cards. Users will be able to check balances, add funds, view transaction history, and apply account balances toward purchases for an efficient pick-up process.

## SuitePoint! Express

Expand your point-of-sale offerings for all retail patrons. Easily switch between staff-assisted and self-checkout transaction modes. Allow employees to skip queues and enjoy more of their break time. Counteract labor shortages by reducing the need for cashiers.

## Inventory Connect

Remotely manage floor stock and item fulfillment at cost centers using a mobile-based inventory module that offers a digital signature on receipts for extra accountability.

## TouchPoint Dining

Improve patient engagement and boost patient satisfaction scores with self-ordering technology that lets patients order their meal while staying compliant with their diet.
