

SOUTHEAST ENERGY POLICY FORUM

presented by the Center for Energy, Transportation & Environmental Policy

Call for Sponsors

Knoxville, TN | August 5-6, 2025

The annual Southeast Energy Policy Forum convenes industry leaders, nonprofits, ORNL, TVA, and government officials for accessible policy analysis, insights on policy process, and policy-centered technical discussions about emerging energy technologies.

The 2025 Forum will foster discussions around four key questions:

- *What can we expect from the new administration?*
- *How much energy demand growth should we expect?*
- *How can we spur the infrastructure development necessary to meet this demand growth?*
- *What is energy security, and how does international trade affect our energy system?*

Past keynote speakers have included former Governor Phil Bredesen, U.S. Representative Chuck Fleischmann, and former high-level DOE officials.

As a sponsor, you'll gain exclusive benefits, including:

- **Showcase Your Success:** Highlight your company's success and innovations to industry leaders and stakeholders through Forum materials.
- **Private Engagement:** Build valuable relationships with top energy experts and decision-makers at a stakeholder reception.
