

SOUTH AFRICA SMART TRANSMISSION WORKSHOP

JUNE 18-19, 2024 | JOHANNESBURG, SOUTH AFRICA

Kevin Thundiyl

Senior Advisor

ENGIE North America

Kevin currently leads greenfield transmission development at ENGIE North America. He leverages his 20 years of experience in the electric industry to identify early to mid-stage transmission development assets across the US that will help meet ENGIE's net zero by 2045 ambition. Prior to ENGIE, Kevin worked in the regulated utilities sector: first at Hawaiian Electric, where he supported renewable energy and transmission planning for the island of Oahu, and later at Exelon Corporation, working on transmission strategy for Exelon's six operating companies in the Midwest and East Coast. Kevin began his career at the Federal Energy Regulatory Commission where he provided insights into electric reliability issues and landmark rulemakings including orders establishing mandatory reliability standards. He earned his bachelor's and master's degrees in electrical engineering from the University of Texas at Austin.
