Eric Amoussouga

Commercial Director, Power Transmission – Sub-Saharan Africa Grid Solutions at GE Vernova

Eric Amoussouga is an industry veteran with over 20 years of experience in the power sector and deep expertise in business development strategy in West and Central Africa.

He currently leads commercial activities for the Power Transmission business line across Sub-Saharan Africa (SSA) for Grid Solutions at GE.

Vernova. As part of his role, Eric leads a team responsible for supporting customers to strengthen their transmission and distribution networks and expanding the business across the region.

Eric started his career with Société Bic S.A. (BIC) in 2000, transitioning to Areva, Alstom, and GE. He moved into progressively senior leadership roles, taking on his current position in 2018. He is passionate about energy and new technology and holds patents in the use of predictive analytics to improve the operations of industrial systems.

Eric holds a Masters degree in Electrotechnical Engineering from the Conservatoire National des Arts et Métiers, in Paris, France. He is based in Abidjan, Côte d'Ivoire, with his wife and four children.
