

# Civil Nuclear Energy Workshop: Partnering for Implementation

OCTOBER 8-9, 2024 | KNOXVILLE, TN

The U.S. Trade and Development Agency will host the Europe and Eurasia Civil Nuclear Energy Workshop: Partnering for Implementation as a platform to promote the safe and efficient deployment of nuclear energy technologies and showcase U.S. solutions that could support the region's clean energy and energy security goals. The Workshop is being organized by USTDA, in cooperation with Oak Ridge National Laboratory.

## BACKGROUND

This two-day workshop will include government experts from more than 25 European and Eurasian countries, U.S. government officials, and industry representatives who will discuss recent U.S., European, and Eurasian initiatives to promote the advancement of civil nuclear energy technologies. The slate of distinguished speakers will cover topics including reactor deployment lessons learned, nuclear solutions for industrial applications, financing, development trends, and other issues impacting project development and delivery. The workshop will also incorporate breakout sessions and one-on-one meetings for direct engagement with key nuclear industry and government officials. Delegates will include regulators, energy officials, and utilities operators from Eastern Europe, Central Asia, the Balkans, and the Caucasus.

Countries throughout the Europe and Eurasia region are taking steps to meet their clean energy objectives and ensure energy security through diversified energy mixes. Within this context, many countries throughout the region are seeking to integrate civil nuclear energy resources, either through the expansion of existing civil nuclear energy programs or the introduction of civil nuclear energy technology.

*Sponsorships are available for U.S. companies. Please visit our website to learn more about how to promote your company throughout the workshop.*

## ABOUT USTDA

The U.S. Trade and Development Agency helps companies create U.S. jobs through the export of U.S. goods and services for priority infrastructure projects in emerging economies. USTDA links U.S. businesses to export opportunities by funding project preparation and partnership building activities that develop sustainable infrastructure and foster economic growth in partner countries.

Attendance and sponsorship are limited to U.S. individuals, U.S. firms, or U.S. consultants as defined in USTDA's Nationality, Source and Origin Requirements, available on USTDA's website at <http://www.ustda.gov/>.

## WHY YOU SHOULD ATTEND

- Hear about current business and project opportunities in Europe and the Eurasian region.
- Learn about commercial and government financial support for civil nuclear energy deployment projects in the region.
- Understand the landscape of Europe and the Eurasia region's civil nuclear energy deployment sector.
- Meet one-on-one with key decision-makers from Europe and the Eurasian region.
- Form new business partnerships with companies in the region.

## KEY TOPICS

- Multilateral cooperation for project delivery.
- Lessons learned with new reactor designs.
- Collaboration to support new reactor technology.
- Financing challenges in civil nuclear energy deployment.
- Non-grid nuclear technologies.
