

Jeffrey Robile

Chairman/CEO

SunElex Group (Pty) Ltd

Jeffrey Robile is Chairman of SunElex Group (Pty) Ltd, delivering strategic plans optimally and sustainably. He provides overall guidance from governance to project development until project implementation, ensuring theory converts into action.

He is an outstanding professional with over 20 years of Senior Management experience and over 10 years in the energy sector, which includes policy-making for the South African Government.

Mr. Robile has a demonstrated history of working in and advocating energy, climate, and sustainability policies, mainly for the energy and ICT industry and across various sectors. Similarly, he has expertise across energy decarbonization, carbon markets, and sustainability strategy development and implementation to help organizations manage and optimize their low-carbon transition.

His uniqueness is combining technical knowledge and business acumen with solid financial understanding. He is passionate about people development, inclusion, and diversity. He is a team player and a skilled strategist, with attention to detail and great passion.

Mr. Robile excels in risk and cost management, strategic planning, sustainability, energy policy development, socio-economic development objectives and targets, effective collaboration, and feasibility studies.

Organization Overview

SunElex is an energy company which aims to help solve current and future energy challenges. As we now move towards the new energy transition in South Africa, we also recognize that part of the success of this transition is not only going to be with increasing net generation, but also will need to address all aspects within the energy value chain (from grid capability and security; creation of new jobs; and facilitation of economic growth which will benefit all social classes).
