

SOUTH AFRICA MUNICIPAL ENERGY RECEPTION

OCTOBER 24, 2024 | DENVER, CO

Meet Municipal Energy Decisionmakers from South Africa

The U.S. Trade and Development Agency will host a reception for U.S. firms to share their energy solutions with South African municipal decisionmakers and learn about potential opportunities in South Africa's growing municipal energy sector.

BACKGROUND

The delegation will include key South African energy decisionmakers across major municipalities who are seeking information on U.S. technologies, services, and best practices to self-generate or procure energy directly from Independent Power Producers (IPPs).

In 2020, the Government of South Africa announced changes to legislation that now allow South African municipalities to procure electricity directly from IPPs, instead of purchasing entirely from Eskom, the country's public utility, as they were previously required to do. At least ten cities and municipalities across the country are exploring these options, presenting a unique opportunity for U.S. companies to export their solutions in support of South African municipalities' energy needs in the areas of generation, mini-grids, and energy storage.

Goals include:

- Promoting energy security across South Africa's municipalities
- Sharing best practices in IPP procurement
- Improving municipal management of the energy across generation, transmission, and storage

ABOUT USTDA

The U.S. Trade and Development Agency helps companies create U.S. jobs through the export of U.S. goods and services for priority infrastructure projects in emerging economies. USTDA links U.S. businesses to export opportunities by funding projects preparation and partnership building activities that develop sustainable infrastructure and foster economic growth in partner countries.

Attendance at this event is limited to U.S. individuals, U.S. firms, or U.S. consultants as defined by USTDA's Nationality Source and Origin Requirements available on USTDA's website at <http://www.ustda.gov/>.

WHY YOU SHOULD ATTEND

- Hear from South African municipalities on current energy capabilities, anticipated needs, and potential procurement opportunities
- Network and build new partnerships with key decisionmakers in a rapidly growing market
- Learn more about important elements in municipal energy dealmaking including financing, delivery, and downstream production

BUSINESS OPPORTUNITIES

- Small to large scale renewable energy generation
- Energy storage solutions
- Data monitoring and management technology
- Digitization technology for grid optimization
- Energy efficiency technologies
