

## Civil Nuclear Energy Workshop: Partnering for Implementation

OCTOBER 8-9, 2024 | KNOXVILLE, TN

### **Vladimír Valach**

Managing Partner

Volt consulting, s.r.o., Slovakia

My current position is Managing Partner with Volt consulting, Slovakia – advisory company operating in energy sector, focusing primarily on renewables and energy efficiency.

Since launch in 2015, we at Volt consulting have been helping international clients to execute investment decisions, operational challenges, and efficiency improvements. We pride ourselves as being an innovative leader in providing strategic solutions for an increasingly sustainable and greener future.

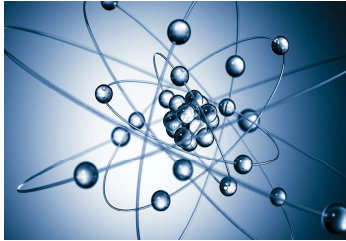

Our typical customers are power and heat producers, who intend to develop renewable energy projects, owners and operators of electricity networks – from microgrids, through distribution and transmission systems, and industrial companies, seeking increased efficiency in energy management and reduced carbon footprint, as well as regulatory and governing authorities.

The primary determinant in our professional operations is the emphasis on delivering substantial value to our clientele. Given this framework, we customarily perform feasibility analyses, evaluating the technical, legislative, and economic foundations coupled with the potential risks associated with the project, and defining the most optimal pathway for project implementation. Upon our client's requisition, we also discern the most apt financial architecture to assure the project's feasibility and augment the return on investment. Our approach is directed towards leveraging novel technologies and contemporary methodologies to offer our clients distinctive, tailored solutions.

In the past 32 years I worked in several executive and managerial positions in the finance and energy areas.

My duties covered the complex area of corporate financial services – accounting, budgeting, controlling, billing, receivables management, operational and CAPEX financing. Developed, implemented and carried forward the application of various benchmarks and KPI's in the finance area and played key role in various acquisition, merger, spin-off and restructuring projects, mainly from the perspective of finance and taxes.
