

First Bus Electric Vehicle Charging

First  Bus

No emissions is our mission!

Through our commitment to operating a zero-emission fleet by 2035, we have made substantial investments in our fleet and the infrastructure that supports our operations in Aberdeen and Glasgow.

Whilst our buses are out on the road during the day, our depot infrastructure is available for partner businesses to utilise to charge their own electric fleets. The hope is that this will allow other businesses within the community to fast-track their own journey to net-zero.

Our
Aberdeen
Depot site
can charge 32
vehicles at
once.
