INTRODUCTION

It is a great pleasure to invite you to participate in the 10th International Symposium on Environmental Hydraulics running from 25 - 27 June 2024, at the University of Aberdeen, Scotland, UK.

The 10th International Symposium on Environmental Hydraulics (ISEH)

will be held in Aberdeen, Scotland on the 25 – 27 June 2024.

Sponsored by the International Association of Hydro-Environment Engineering and Research (IAHR) and hosted by the Fluid Mechanics Research Group at the University of Aberdeen, the 10th ISEH will build on the success of previous ISEH symposia in bringing together researchers and practitioners in environmental hydraulics to exchange knowledge, share ideas, and present and discuss new research, technical innovations, and case studies.

Under the theme “environmental hydraulics for a sustainable and resilient future”, the symposium covers modelling and laboratory and field-based measurements relating to, inter alia, open channel and fluvial hydraulics, coastal hydraulics, urban hydraulics, porous media flow, gravity currents and stratified flows, eco-hydraulics, renewable energy hydraulics, flow-vegetation interactions, flow-biota interactions, sediment transport, microplastics in fluvial and marine environments, remote sensing in environmental hydraulics, extreme events, AI in environmental hydraulics, dispersion and mixing, aquaculture hydraulics.

The 10th ISEH brings the symposium to the UK for the first time in its history. It will involve approximately 200 delegates from the UK and internationally, 3 keynote speakers, and 3 full days of technical presentations organised in 3 or 4 parallel sessions. It will be held within the University’s historic Old Aberdeen campus, providing an ideal setting in which to share knowledge, network and develop collaborations.

The symposium also provides an ideal opportunity for hydraulics-related companies and organisations to raise their profile amongst researchers and other practitioners by participating in the conference and, ideally, by signing up to one of the sponsorship packages detailed in this prospectus. A healthy level of sponsorship enables us to lower registration fees, support keynote speakers with travel costs, and provide financial support to student delegates and delegates from developing countries.

Thank you for your support of the 10th ISEH.
