Prof Dr Heidy M. W. den Besten

Heidy den Besten is Professor Food Microbiology at the Laboratory of Food Microbiology of Wageningen University. Her research group focuses on pathogen ecology interlinking functional genomics and prediction of microbial behaviour and risk assessment. She is teaching within the MSc and BSc Food Microbiology programmes of Wageningen University and coordinates a BSc Food Microbiology course in Wageningen and in Singapore. She acts as editorial board member of the International Journal of Food Microbiology and has been editorial board member of the Journal of Food Protection for 6 years. She served the International Association of Food Protection as member of the Program Committee from 2016-2022, and joined the board of the International Committee on Predictive Modelling in Food in 2021.

She is active in various national and international expert working groups, including the Dutch Health Council, ILSI-Europe, the International Standardization Organization, and the Joint FAO/WHO Expert Meetings on Microbiological Risk Assessment (JEMRA).
