

# 13th ICPMF

International Conference on  
Predictive Modelling in Food

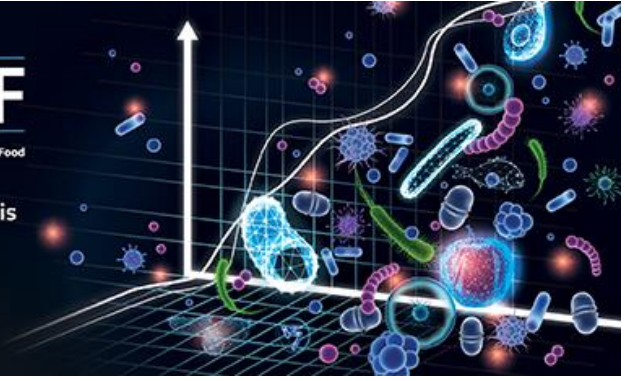

1-3  
Sept.  
2025

Technopolis  
City of  
Athens

AFEA

## Vasilis Valdramidis

Dr. Vasilis Valdramidis (Male) is an Associate Prof at the National and Kapodistrian University of Athens (Department of Chemistry) and visiting Associate Prof at the University of Malta. He holds a Ph.D degree in Chemical Engineering from the Catholic University of Leuven, Belgium and a primary degree in Agriculture (Food Science and Technology) from the Aristotle University of Thessaloniki (Greece). He undertook research at several EU Institutions, i.e., the Agricultural University of Athens (Greece) in predictive microbiology, the Agri-Food and Bioscience Institute (UK) in non-thermal technologies and food safety, the French National Institute for Agricultural Research (INRA -Lille, Saint- Genès Champanelle) (France) in food equipment hygiene, the Dublin Institute of Technology and the University College Dublin (Ireland) in non-thermal technologies and predictive microbiology. He is active in the disciplines of quantitative microbiology, food safety and food preservation. He acted as coordinator in Marie Curie (CIG) and educational Erasmus + projects, while he acts/acted as coordinator PI of UM in several Horizon Europe, H2020 and FP7 projects. He is treasurer of the International Committee on Food Microbiology and Hygiene and member of the International Commission of Food Mycology, while he is currently in the editorial boards of International Journal of Food Microbiology, and Journal of Food Protection.
