

The global situation of genome editing policy

Thorben Sprink¹; Ralf Wilhelm¹; Frank Hartung¹

¹Julius Kuehn-Institute; Quedlinburg, Germany

Many countries already made decisions on the regulatory status of products of genome editing. However, the legal guidance given, differs between countries even in the same region. In addition to that several countries are still debating on policy options or are in the process of updating guidance and regulatory systems to cover (some) products of genome editing. The current global situation of the regulatory systems is far off from a harmonized framework in the far future. In this talk, the current developments in the field of regulation is presented
