

Application for EFTF 2026 student travel support

The EFTF Executive Committee and the Local Organisation Committee are proud to partner with Société Française des Microtechniques et de Chronométrie (SFMC) to provide financial assistance to selected students attending the EFTF 2026 conference. Thanks to generous grants from major National Metrology Institutes and Private Companies students may apply for a support. Please note that it is a condition of the award of student travel assistance, that the student concerned attends the tutorial programme on Monday April 20, 2026.

Students interested in applying should download, complete, and return this application form. Any full-time graduate student enrolled in a recognized course of study related to Time & Frequency or applications is eligible to apply. After application submission, the selection committee may request additional information from the student or supervisor to verify student status or the nature of the course of study. All applicants should first submit an abstract to the conference via the normal abstract submission procedure before submitting their financial aid application form. Students need to be the first author and the presenting author (poster and oral contributions are eligible).

Applications are due on November 30, 2025, sent by e-mail to fsthal@supmicrotech.fr. This deadline is firm, as awards will be announced no later than February 1st, 2026. Further details on the method of reimbursement will be communicated to the award recipients.

Please fill out all fields of the application form below, and submit it to fsthal@supmicrotech.fr no later than November 30, 2025. The signatures of both the student and the supervisor are required. All students and supervisors will be notified of award decisions by e-mail.

Personal information

Last (family) name:

First (given) name:

Preferred phone number (including country code):

E-mail address (will be used for all communications from EFTF 2026 regarding the travel grant):

Educational information
