Instructions for Oral presenters

We look forward to welcoming you to the European Navigation Conference 2026! As presenter, your participation is key to the success of the conference, and we want you to feel ready for it. To help you, we have put together this guide. We kindly ask you to carefully read it ahead of the event.

Presentation Requirements

- The time allowed for your presentation is **15 minutes**, followed by **5 minutes** for questions. Please ensure that your speaking time is not exceeded.
- Prepare your presentation in **PowerPoint (.PPT or .PPTX format)** using landscape orientation. Use a **16:9 ratio** to optimize the display on standard screens. Use PowerPoint 2016 or a later version for PC. Alternatively, PDF files are also accepted. Please note that Apple Keynote (*.key) formats are **NOT supported**. If you're using a Mac, convert your presentation to a Windows PC-compatible format and test it before submission.
- The first slide must include **the title of your presentation** as listed in the final programme.
- Name your file with your name and date/time of presentation, as follows:
[Year month day_time_presenters-name_title-short]
For example: *20260429_1000_Smith_sample-presentation-title*
Do not just use the name of the conference or the presentation title. This will prevent any confusion when loading the presentation on the onsite computer.

Technical Recommendations

Fonts & Images

- Use only **standard PowerPoint fonts** to avoid compatibility issues. The fonts that are used in the presentation need to be Latin-based fonts.
- If special fonts are required, they must be stored as „embedded fonts“ with the presentation. (File -> save as „name of presentation“ and under „tools“ -> save options mark the checkbox „embed True type fonts“ and select „embed all characters“) When using mathematical symbols, please use these which are available under Latin fonts (unicode or DOS: Western Europe).
- **JPG format** is preferred for images.

Videos & Audio

- Videos must be **embedded** in the PowerPoint presentation. Ensure they play correctly on a Windows PC. Do not use links to online videos (e.g. YouTube), as they may not function during the presentation.
- Format for embedded movies: “*.mp4” and “*.wmv” are preferred, any other format may work or may be converted to an optimized format (may take some time). The upload of “DVD-Movies” is not supported.
