

Our Expertise

Prevention & treatment

- HIV, TB, Hepatitis B&C
- Male Circumcision
- Social Behaviour Change

Healthcare Solutions

Disaster medicine

- COVID-19 response

The Innovative use of digital technology:

- Strategic information
- GIS surveillance & patient tracing
- Implementation Science

Pharmacy innovation and automation

Right to Care (RTC) – Africa's leading health NGO

With a proven track record in setting up, scaling and maintaining innovative health solutions driven by high-level data analytics, RTC works closely with a range of multi-sectoral strategic partners, health ministries and USG donors in South Africa (SA), across the African continent and other parts of the world. We employ over 4 500 staff across 7 countries.

Our experience

Massive SA healthcare solutions

As world **infectious disease** experts, RTC:

- Pioneered **HIV treatment in SA**
- Delivered (and continues to deliver) innovative public healthcare for 20+ years
- Commonly voted one of the best implementing partners
- Runs the **largest treatment site in the world** at Helen Joseph Hospital in Johannesburg
- Built **Africa's largest NGO/NPC**.

Grant Management and Governance

- **20 years of grants management experience:**
- Currently managing R1.5Bn/yr from USAID, Global Fund to Fight AIDS, TB & Malaria, CDC, WHO, and GIZ
- Plays a role in 50+ partnerships with global and local organisations
- **Unqualified audits in the past 19 years**
- **Safely manages grant funding.**

First African Global HIV organisation

Outside SA, Right to Care International is funded through the USAID EQUIP mechanism:

- Reached **17 countries**
- Fully localised NGO in Zambia, Malawi, Lesotho (HIV/Aids and COVID-19 response).

Pharmacy innovation and automation

Through Right ePharmacy, RTC spearheads **disruptive innovation** and **enhancing differentiated models of pharmaceutical care** in Africa:

- Right ePharmacy provides **automated easy-to use**, safe and managed **chronic medication** dispensing services including smart lockers and in-pharmacy automation.

Prevention & treatment

- Conducted **15 000 000+ HIV tests**
- Supported **1 000 000+** patients living with HIV **with ART**
- Performed over **1.4 million circumcisions** for HIV prevention
- Initiated over **100 000** pregnant women on ART with positivity rates of **less than 1%** for their babies
- Actively prevented the underlying cause of **cervical cancer in women (HPV)**.

Disaster medicine response

- Supported the **Ebola response** in Sierra Leone and the **Cholera response** in Zambia
- Supporting **SA's COVID-19 response** through ministerial advice, strategic planning, surveillance, the **electronic vaccination data system (EVDS)** and rural vaccination support
- Supporting the COVID-19 response in Zambia, Eswatini, Namibia & Malawi.
