## Overview

Ever wondered how we can redefine our approach to reduce Surgical Site Infections (SSI)?

Join our symposium on **May 16th at 3:15 PM** which is happening as part of the **SIS-E 2024 Congress in Barcelona!**

Our esteemed faculty will kickstart the session with a rigorous review of evidence and guidelines supporting SSI reduction care bundles. We will then explore robust strategies for SSI surveillance, emphasizing the power within your own SSI data. Discover untapped possibilities and practical applications that arise when taking control of this valuable information.

This symposium will also address existing gaps in SSI classification and unravel how industry can actively contribute to elevating standard of Wound Care and help moving to Zero SSIs. Join us for a discussion that shapes the future of SSI understanding.

The Speakers will be available on stage for the entire time of the symposium engaged in discussions and answering questions from the audience!

## Agenda
