

Sheffield™ rAlbumin ACF

ANIMAL COMPONENT FREE rHSA

Sheffield™ rAlbumin ACF is an animal-component-free replacement for HSA, BSA, and can be used to reduce/replace serum when used as a stand alone supplement or when combined with other components such as plant-derived protein hydrolysates.

Sheffield™ rAlbumin ACF has been shown to outperform other established albumin products and is a cost-effective alternative to other commercially available non-animal based albumin products.

Applications

- Supplement in cell culture
- Commercial bioproduction
- Tissue culture
- Western blots or ELISA assays

Benefits

- Animal component free (ACF)
- Performance enhancer in commercial bioproduction
- Carrier for lipids in tissue culture applications
- Enhanced cell cloning efficiency
- Cryopreservation of various cell lines
- Standard in protein calibration studies
