CameraMatics

AUTOMATE SAFETY AND PERFORMANCE

GeniePro. The fast, easy way to drive safety and efficiency in your fleet
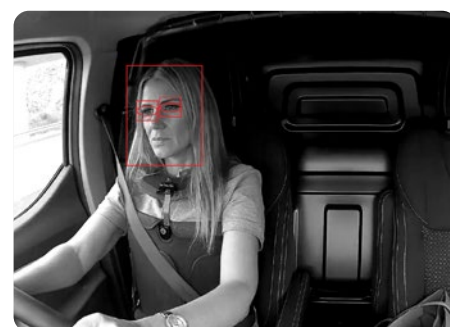

The CameraMatics GeniePro is everything you need to prevent accidents, save fuel and optimise fleet management, with forward-facing and driver-facing camera coverage, integrated telematics and AI-powered insights.

" We chose CameraMatics because of adaptability. We chose CameraMatics for scalability. We chose CameraMatics for partnership."

Chris Lively,
Fleet Director
CW Wright

Improve safety

The GeniePro supports up to three cameras, providing the data your organisation needs to detect and resolve driver and driving issues across your fleet. We act on thousands of camera and telematics data points to deliver personalised driver training that improves fleet safety over time.

Reduce operational costs

Backed by the CameraMatics Safety Center, GeniePro promotes safer, more efficient driving habits, reducing fuel consumption, wear and tear, and helping to meet sustainability targets. We ensure vehicles are used efficiently, idling time is reduced, and that common maintenance and other tasks are automated as much as possible.

Prevent theft and fraud

Camera coverage deters theft and protects your fleet and cargo, and with video capture of accidents you are protected against insurance fraud. GPS tracking means you always know where your vehicles are, and we provide the ability to ensure they stay within pre-defined operational areas.

Incredibly easy to install

The GeniePro comes in a single package, easily installed on the windshield of any vehicle, and easily adjustable to meet your precise requirements. Integrated with the CameraMatics safety centre, it also supports active management and communication with your workforce for improved operational efficiency.

A single, integrated fleet management solution

CameraMatics GeniePro is more than cameras. It is an integrated safety platform that gives your business the data and insight needed to prevent accidents and improve your efficiency across the board

Video-based safety

The cameras you need to improve safety across your fleet

- **Forward-facing camera, automatically capturing key events**
- **Driver-facing camera and automatic detection of fatigue, distraction, smoking and phone use. Driver camera can be disabled if necessary**
- **Driver safety self-coaching**
- **Cloud-based video retrieval**

Apps and driver workflows

Smart workflows automate time-consuming manual paperwork and compliance checks to minimize downtime.

- **Driver/vehicle sign-in**
- **FNOL and incident reporting**
- **Digital vehicle checks**
- **Compliance (ELD, Tachograph, Hrs of Service, Vehicle inspections)**
- **Mobile forms & workflows**

Vehicle Telematics

A full telematics solution provides powerful insights related to:

- **Mileage & real-time GPS tracking**
- **Harsh braking / cornering detection**
- **EV & fuel tracking & reporting**
- **Live vehicle status (active, idling, offline)**

Asset monitoring

Monitor your assets in real-time, prevent theft and increase utilization, all with one system.

- **Location & theft monitoring**
- **Utilization reporting**
- **Status monitoring & alerting**
- **Geofencing**

" CameraMatics is very important to us and will become more and more important over the coming years."

James Andrews,
IT Director
Maritime Transport Ltd
