

CameraMatics

AUTOMATE SAFETY AND PERFORMANCE

A safer, smarter fleet

CameraMatics is everything you need to prevent accidents, save fuel and optimise fleet management, with 360 camera coverage, telematics and AI-powered insights.

Stop accidents

We provide 360° camera coverage, AI-powered hazard detection, and automated driver warnings to ensure you prevent accidents – rather than deal with their aftermath. We act on thousands of camera and telematics data points to deliver personalised driver training that improves fleet safety over time.

Reduce operational costs

We promote safer, more efficient driving habits, reducing fuel consumption, wear and tear, and helping to meet sustainability targets. We ensure vehicles are used efficiently, idling time is reduced, and that common maintenance and other tasks are automated as much as possible.

Prevent theft and fraud

We watch over your fleet and its contents 24/7. Our cameras capture every event, inside and out of the vehicle. GPS tracking means you always know where your vehicles are, and we provide the ability to ensure they stay within pre-defined operational areas.

" We chose CameraMatics because the team were proactive, the technology was second to none and integrated with so many of our existing technologies. We haven't looked back!"

William Flanagan, Owner
Zellwood Ltd

A team you can trust

We're a partner in your success. Not a product reseller. Our customer success teams work with every one of our customers to improve fleet efficiency and deliver ROI. Our engineers are constantly evolving and improving the CameraMatics platform to ensure we remain the most sophisticated solution on the market. And we're local – so you'll always have someone to talk to.

A single, integrated fleet management solution

CameraMatics is everything you need in a single, scalable solution. No more bolting together products and services from multiple manufacturers. We do it all.

Video-based safety

An all-in-one fleet management system that provides transformative real-time support to drivers and fleet managers. Improving fleet safety and performance.

- Real-time AI hazard detection
- 360° predictive collision detection
- Instant driver feedback
- Driver safety self-coaching
- Cloud-based video retrieval

Vehicle Telematics

A full camera plus conventional telematics solution provides powerful insights related to:

- Mileage & real-time GPS tracking
- Harsh braking / cornering detection
- Vehicle diagnostics & maintenance
- EV & fuel tracking & reporting
- Vehicle idle time

Apps and driver workflows

Smart workflows automate time-consuming manual paperwork and compliance checks to minimize downtime.

- Driver/vehicle sign-in
- FNOL and incident reporting
- Digital vehicle checks
- Compliance (ELD, Tachograph, Hrs of Service, DVIR)
- Mobile forms & workflows

Asset monitoring

Monitor your assets in real-time, prevent theft and increase utilization, all with one system.

- Location & theft monitoring
- Utilization reporting
- Status monitoring & alerting
- Geofencing
- Refrigerated trailer & cold chain monitoring

" CameraMatics is very important to us and will become more and more important over the coming years."

James Andrews, IT Director,
Maritime Transport Ltd
