

HemaCollect

Staffing and Mobile Drive Management

HemaCollect makes it easy to manage staff and schedules at donor centers and mobile drives. Integrated with hospital order entry, real-time inventory, product and equipment QC, and donor recruitment, HemaCollect provides go-anywhere flexibility that keeps staff, schedules and locations connected in real time.

HemaCollect is the only staffing and mobile drive management solution capable of fully addressing complex scheduling and staffing at local, regional and national levels. Comprehensive, toggle-based calendars provide visibility from any location and device into staffing operations and schedules—across a collection operation, region or enterprise. Enterprise-based localization allows for configuration of workflows using the hierarchies of the organization.

HemaCollect empowers recruiters, staffers and collections staff

Web-enabled with a mobile-first design, HemaCollect empowers recruiters, staffers and collections staff with real-time collections information and drive details at any time and from any device to keep them focused on the needs of your supply chain. HemaCollect is the only staffing and drive management solution to leverage data for improved collections from across the supply chain. Integrations with HemaControl provides current inventory and hospital demand and with HemaConnect for donor recruitment and scheduling information.

Mobile collections staff have current inventory needs at their fingertips

With the power of a fully integrated supply chain, mobile collections staff have current inventory needs at their fingertips and can convert donors to the right product at the right time. Real-time donor scheduling ensures you can maximize efficiency and minimize wait times, and staff can even open and close appointment slots on the fly to respond to donor flow.

Supports employee work-life balance and schedule equity

Human capital management features support retention and nurturing of collection staff and help to identify potential staff issues. Optional *smart staffing* features

Continues

provide optimal staffing suggestions based on collection needs, shift equity and account-level preferences. This system also manages staff time off, staffing availability and leave requests, or can integrate with an organization's timekeeping tools with IT-friendly APIs (application interfaces). HemaCollect also supports employee work-life balance and schedule equity by providing employees with access to tools for managing their schedules and trading shifts on the go.

The Power of InVita's Integrated System

Like all InVita products, HemaCollect integrates with other systems that manage hospital order entry, real-time inventory, donor recruitment and engagement, and product QC to provide visibility into critical data across the entire supply chain.

The Only Fully Integrated Blood Management Solution on the Market
