

## FULLY DIGITALISED BER ASSESSMENT SOFTWARE

**BERGO®** is a comprehensive digital platform that simplifies and automates the onsite BER assessment process.

### DIGITAL FLOOR PLAN CREATION

Efficiently create accurate floor plans onsite. Indicate important information such as heat loss perimeters and dwelling extensions.

### AUTOMATED CALCULATIONS

Eliminate manual errors and reduce the time spent on complex calculations, ensuring precise energy ratings.

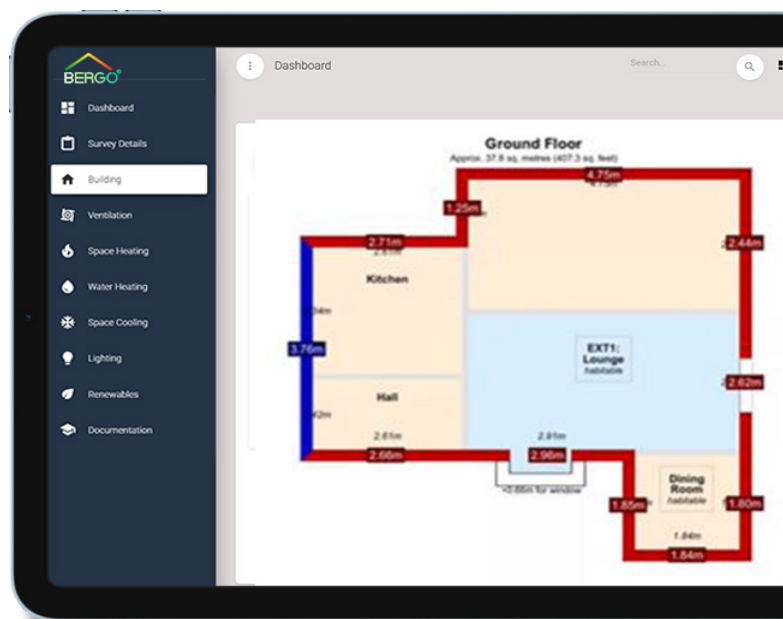

### MANAGEMENT & SCHEDULING

Optimise time by managing assessment jobs and workflows more effectively.

### SUMMARY REPORTING

Streamline the generation of detailed assessment reports, ready for submission to the SEAI database.

BERGO® is designed to empower assessors to perform comprehensive assessments without the need for manual calculations. By automating data capture, BERGO® streamlines the entire workflow, enabling faster, more accurate submissions.
