

Dr Ida-Keshia Sebelego

South Africa

Ida-Keshia Sebelego is a qualified diagnostic radiographer. She worked as a diagnostic radiographer from January 2010 until July 2013 at Kimberley Hospital Complex, currently known as Robert Mangaliso Sobukwe Hospital. She started to lecture at the Central University of Technology (CUT) in August 2013 as a junior lecturer in Radiography. She is currently a senior lecturer at CUT and the modules she facilitates are Patient Care Management. She also participates in the Scholarship for Teaching and Learning (SoTL) project at the CUT. She won the Vice-chancellor excellence award for Early Career Teaching award November 2017 and the Vice-chancellor excellence award for Community Engagement award November 2021.

Ida-Keshia has a PhD in Radiographic Sciences from the University of the Free State. The title of her thesis was "Development of local diagnostic reference levels for abdominal computed tomography using size specific dose estimates". Her research interests are image quality for plain radiography, infection control practices in radiography and diagnostic reference levels specifically for computed tomography. She has received a staff grant from the Department of Higher Education and Training (DHET) in the year 2015, 2016, 2019 and 2020. She also received the Thuthuka grant for her PhD, tracking grant from the NRF for the years 2020 to 2022. She is currently busy with a Post PhD project.
