

Dr Peter Schoub

South Africa

Dr Peter Schoub qualified as a doctor in 1998, and as a radiologist in 2007. For the last 14 years he has focused on breast radiology.

Dr Schoub established the Parklane Women's Imaging Center in 2012. The center became the first American College of Radiology (ACR) accredited unit in South Africa in 2017, and was awarded the Breast Imaging Centre of Excellence designation in 2022.

The mammography department has recently moved to a new home at Melrose Arch.

Dr Schoub participates in several multidisciplinary breast cancer teams around Johannesburg. Within the context of the team, Dr Schoub works closely with surgeons and oncologists, assisting with diagnosis, staging, monitoring tumour response and presurgical localisation. He has recently introduced cryoablation for small breast cancers into the unit.

Dr Schoub obtained the European Diploma of Breast Imaging in 2018.

He is the chairperson of the Breast Imaging Society of South Africa (BISSA), and is an honorary lecturer in the department of Radiology at the University of the Witwatersrand.
