

## Prof Habib Rahbar

Seattle, Washington

---

I am an ABR board-certified, fellowship-trained academic radiologist specializing in breast imaging with an active license to practice in Washington State. I have extensive research, teaching, clinical, and administrative experience. My areas of research interest include the use of breast MRI including DWI to identify imaging markers of cancer risk, especially for improved risk-stratification of ductal carcinoma in situ. Administratively, I currently serve as Executive Vice Chair of Radiology for the University of Washington. I am a fellow of the Society of Breast Imaging and the Imaging Chair of the Breast Committee for ECOG-ACRIN.
