

Dr Fabian Laage Gaupp

United States of America

Fabian M. Laage Gaupp graduated from medical school at Ludwig Maximilians University Munich, completed a surgical intern year at Cornell Presbyterian Hospital in New York, followed by residency training in Diagnostic and Interventional Radiology at Yale New Haven Hospital, where he served as Chief Resident of Interventional Radiology in 2020-2021.

Dr. Laage Gaupp specialises in Men's and Women's Health, offering minimally invasive treatments for benign prostatic hyperplasia (BPH) and uterine fibroids. Image guided prostate artery embolisation and uterine fibroid embolisation provide effective treatment of these very common conditions on outpatient basis without need for major surgery, allowing patients to go home the same day.

He is a co-founder of Road2IR, an international consortium lead by Yale, Muhimbili University of Health and Allied Sciences (MUHAS) in Tanzania, Emory, and other institutions in North America and Europe which has established one of the first accredited IR training programmes in sub-Saharan Africa.

The project was awarded with an RSNA R&E Foundation Derek Harwood-Nash International Education Scholar Grant in 2020 and MUHAS was selected as the world's second RSNA Global Learning Centre (GLC). The programme now serves as a blueprint for partner programmes in Rwanda and Uganda, aiming to bring minimally invasive IR procedures to more patients in East Africa and beyond.
