

Dr Thabile Mandy Bhengu

South Africa

As an accomplished and experienced diagnostic radiographer for over 20 yrs, Dr Bhengu has cultivated and nourished a passion for Interventional Radiology(IR) in the past 8 years. Her dedication to this emerging specialty is evident through her strong advocacy for knowledge sharing and mentorship as we strive towards wider access to certification in our industry. Her current focus is increasing exposure, comfort and competence in radiographers related to IR. Her approach is rooted in the belief that knowledge is the key to superior performance, and she is committed to fostering an environment that nurtures this philosophy.

Dr Bhengu currently works at WDGMC Radiology, and works with Interventional radiologists from patient preparation pre-procedures, inventory and consumable knowledge, sourcing, procurement and stock control to ensure an efficient work environment in the IR suite and x-ray department.

She is also involved with teaching and mentoring radiographers new to IR and a member of the radiology department management team.
