

## Dr Andrea Dell'Orso

Italy

---

Dr Andrea Dell'Orso is an Italian Radiographer in Azienda Usl Toscana Centro near Florence with 14 years of experience in the field.

He invented, patented and developed a new method for the orthogonal reduction of artifacts in MRI. The scientific research has been presented at the last 3 Workshop on Motion Correction proposed by ISMRM.

He is the Promoter and Principal Investigator in the research project: "A new method for the reduction of phase coding artifacts in magnetic resonance imaging".
