

Dr Gregory Makris

United Kingdom

Gregory specialises in endovascular therapies and interventional radiology (IR) in London, UK. He is a director and global clinical lead in the vascular and thrombosis therapeutic division of Bayer Pharmaceuticals and an honorary consultant at Guys' and St Thomas' Hospitals in London.

He graduated from the medical school of Athens and then pursued a PhD in vascular surgery at the Imperial College of London, UK. This was followed by an Academic Clinical Fellowship in clinical imaging at Cambridge University and a fellowship in endovascular surgery and interventional radiology at Oxford University Hospitals, UK. He is also a fellow of the Royal College of Radiology since 2018.

Dr Makris is passionate about research and is the main author of many peer-reviewed publications and book chapters, a past CVIR endovascular journal editorial board member, and a peer reviewer for several international journals. He is also the past chairman of the European Forum for interventional radiology trainees (ETF) under the auspices of CIRSE and past chair of the BSIR trainee committee (2018-2019) with significant work on understanding and improving IR training standards in Europe at an undergraduate and postgraduate level. His main interests include vascular and women's health, MedTech and drug innovation, IR education, and raising awareness around the role of IR in global health.
