

Ms Kim Hutchings

United Kingdom

Kim Hutchings has over 40 years of experience as a radiographer, radiology manager and senior hospital manager in London.

She currently leads the development and engagement team for NHS Providers, delivering training for senior hospital executives and governors across the UK, as well as working part-time as a radiographer at Lymington Hospital, Hampshire, UK.

Kim is an experienced forensic radiographer, and as Superintendent Radiographer and Radiology Manager of the Homerton University Hospital in London, she gained extensive experience in the management of NAI cases, establishing protocols, standards and training for radiographers undertaking a forensic investigation.

She has worked as a member of the International Association of Forensic Radiographers' Disaster Victim Identification Team, responding to the 2004 SE Asia Tsunami and several terrorist incidents in London.

She has lectured widely on the subject, both in the UK and at international conferences and is a visiting lecturer at Cranfield University Forensic Institute.
