

Dr Ida-Keshia Sebelelego

South Africa

Ida-Keshia Sebelelego is an academic and diagnostic radiographer, currently serving as a senior lecturer and programme coordinator at the Central University of Technology. With a career spanning more than a decade in radiography education, she holds a PhD in Radiographic Sciences, where her research focused on developing local diagnostic reference levels for abdominal computed tomography (CT) using size-specific dose estimates (SSDE). She is presently engaged in a Post-PhD project on diagnostic reference levels. Ida-Keshia actively supervises postgraduate research projects, has published extensively in peer-reviewed journals, and has presented at numerous conferences, contributing significantly to radiography education, diagnostic imaging, and radiation protection. She currently serves as Chair of the SORSA DRL Task Team (2025–2029), reflecting her leadership in advancing radiographic practice and education.
