

Mr Kgaugelo Moropane

South Africa

Kgaugelo has a B-tech in diagnostic radiography, an advanced business management diploma, and a master's degree in public health.

He has worked with renowned organisations implementing high-volume screening projects, including globally funded TB projects in correctional services, finding missing TB cases in communities and primary healthcare facilities, and TB prevalence survey projects in Namibia and Swaziland.

He is a contributor for FIND, who advised WHO on the endorsement of CAD systems for TB screenings programmes and the publication Diagnostic Accuracy of chest X-ray interpretation for tuberculosis by three artificial intelligence-based software in a screening use-case: an individual patient meta-analysis of global data.
