

Prof Napapong Pongnapang

Bangkok, Thailand

Napapong Pongnapang serves as an associate professor at the Department of Radiological Technology, Mahidol University in Bangkok, Thailand. Additionally, he holds the position of adjunct senior lecturer in Medical Imaging and Radiation Sciences at the Faculty of Medicine, Nursing and Health Sciences, Monash University, Australia. His academic journey began with a bachelor's degree in Radiological Technology from Mahidol University, followed by doctoral studies at the University of Texas Graduate School of Biomedical Sciences in San Antonio, Texas, USA, where he earned his doctoral degree in Medical Physics. Currently, Napapong leads as the President of the International Society of Radiographers and Radiological Technologists, ISRRT. Within Thailand, he holds the Vice-President position at the Radiological Society of Thailand and serves as a committee member of the Thai Medical Physicist License Board. He actively contributes to international education and training initiatives for radiographers and medical physicists. His research interests span physics measurement in diagnostic radiology, patient dosimetry, and radiography education. Napapong's involvement extends to international organizations such as the International Atomic Energy Agency (IAEA), where he lends his expertise to numerous international and regional projects.
