The AI Shift: Transforming Education and Skills Development What AI really means for educators and learners

24 JUNE 10:05 - 11:05

Technology Zone

ABOUT THIS SESSION

The AI Shift explores how artificial intelligence is already transforming teaching, learning, and operations across the education and skills sector. This practical, hands-on session introduces a variety of AI tools you can start using immediately—no technical background required—while also addressing the critical issues of ethics, privacy, and trust.

WHY YOU SHOULD ATTEND THIS SESSION

Build your confidence to engage with AI in a meaningful, safe, and ethical way. Leave with a toolkit of practical examples, ideas to take back to your organisation, and a clear understanding of how to start (or strengthen) your AI journey.

WHO SHOULD ATTEND THIS SESSION

Educators, trainers, curriculum developers, digital leads, and operational staff looking to explore practical, ethical uses of AI in teaching and learning. Ideal for anyone seeking to enhance personalisation, boost efficiency, and begin or build on their organisation's AI adoption journey—no technical expertise required.

SPEAKER OVERVIEW

Richard Parker is a Senior Product Manager at Firebrand Training, where he leverages over 20 years of experience in the IT sector to deliver exceptional training and support. As Chair of the AELP IT & Digital Sector Forum, he is dedicated to supporting training providers and ensuring they stay up to date with industry developments. As Senior Product Manager at Firebrand Training, he keeps at the forefront of IT technology, including AI, by studying the development and deployment of cutting-edge AI solutions and training certifications.
