## AI in Learning Delivery: Friend or Foe?

**MONDAY 23 JUNE**

### **TECHNOLOGY Zone**

#### **ABOUT THIS SESSION**

AI is already reshaping assessment in training delivery, but how much time can it really save? Join Bud's Senior Business Analyst, Chris Greatorex, for a hands-on session exploring the practical impact of AI on the marking process. Through live polling, discussion, and a real-time demo that will compare AI-powered marking with manual methods, we'll highlight where the real efficiencies lie. This interactive workshop will offer clear, actionable insight into how AI can streamline assessment, reduce workload, and enhance learner outcomes."

#### **WHY YOU SHOULD ATTEND THIS SESSION**

Cut through the hype and gain a grounded, hands-on understanding of how AI can drive efficiency and improve learning delivery. Walk away with actionable ideas, greater confidence in adopting AI, and inspiration from how other providers are approaching these innovations.

#### **WHO SHOULD ATTEND THIS SESSION**

Curriculum and assessment leads, digital learning specialists, quality managers, and senior staff within training providers exploring the responsible use of AI. Ideal for those seeking to enhance learning delivery, streamline assessment, and future-proof their apprenticeship provision through practical, compliant AI integration.

#### **SPEAKER OVERVIEW**

Chris Greatorex brings over a decade of experience in software solutions and apprenticeship provision. With seven years' experience in a leading apprenticeship provider, Chris specialises in IT and business change initiatives, including CRM and Learner Management Systems launches. He is passionate about leveraging technology for organisational growth and enhancing the learners' experience throughout their journey.
