

SHELL SCHEMES

Like last year, we are using an Octanorm style Shell Scheme System featuring silver aluminium metalwork, white Foamex infill panels, and built to an overall height of 1.0m or 2.46m, inclusive of all-sufficient bracing components where necessary.

Lion Exhibitions offer a graphics production and installation service to shell scheme exhibitors and space only exhibitors who have a back wall. They offer both infill graphic panels (mounted within the framework of the stand) and seamless graphic panels (mounted over the top of the stand metalwork). Please contact Lion Exhibitions for more information or order using the forms (found in the exhibitor guide).

Each stand will include the exhibitor's name, and a Headerboard provided by the exhibitor (40 characters maximum) – please see examples below.

ORDERING FOR GRAPHICS, FURNITURE, ELECTRICS, AND SHELL SCHEME EXTRAS

Please complete your order for graphics, furniture, electrics, and shell scheme extras via the order form that can be downloaded via Lion's website [here](#). Please visit the order forms section for more information.

Once completed please send to info@lionexhibitions.com – please cc rseabourne@aelp.org.uk so the Rosie Seabourne from the AELP Events Team is aware of your order.

Visit: <https://www.lionexhibitions.com/> for more information.

SHELL SCHEMES at National Conference 2022
