GENERAL INFORMATION

EAGE

The European Association of Geoscientists and Engineers (EAGE) is a global professional, non-profit association for geoscientists and engineers with 19.000 members worldwide. The objective is to collect and distribute technical knowledge. EAGE organizes events and publishes a monthly magazine for its members and 5 scientific journals. All members of EAGE are professionally involved in (or studying) geophysics, petroleum exploration, geology, reservoir engineering, mining and mineral exploration, civil engineering, tunneling and environmental matters. EAGE's head office is located in the Netherlands with regional offices in Dubai, Kuala Lumpur and Bogota.

AAPG

Since its founding in 1917, the American Association of Petroleum Geologists has been a pillar of the worldwide scientific community. The original purpose of AAPG, to foster scientific research, to advance the science of geology, to promote technology, and to inspire high professional conduct, still guides the Association today. AAPG provides publications, conferences, and educational opportunities to geoscientists and disseminates the most current geological information available to the general public.

SEG

The Society of Exploration Geophysicists (SEG) is a global not-for-profit organization with a mission of connecting the world of applied geophysics. Founded in 1930, SEG provides information, tools, and resources vital to advancing the science of exploration geophysics, fostering common scientific interests, supporting humanitarian efforts, and accelerating geophysical innovation. Inspiring the geophysicists of today and tomorrow, SEG's long-standing tradition of excellence in education, professional development, new business generation, and engagement cultivates a unique community platform that encourages collaboration and thought leadership for the advancement of geophysical science around the world. Headquartered in Houston, Texas and with regional offices in Dubai, UAE; Beijing, China; Kuala Lumpur, Malaysia, and Tulsa, OK; SEG is a global society dedicated to enhancing the present and future of applied geophysics.

ABOUT THE WORKSHOP

CCS/CCUS technologies have emerged as critical solutions for mitigating greenhouse gas emissions, particularly in the rapidly industrializing and urbanizing Middle East region. Both the subsurface technical knowledge and related data sets of the petroleum industry are major inputs required for the world to successfully move towards a carbon-neutral and sustainable energy future. The Middle East with its exceptional petroleum systems and wealth of subsurface knowledge is a prime candidate to lead the CCS efforts worldwide.

The goals of the workshop are to promote knowledge sharing on the latest capture, transport and storage advances from renowned experts and industry professionals, focus on subsurface workflows for CCS evaluation through technical presentations, accelerate further consideration of the application of mainstream CCS technologies in the Middle East region, and exchange ideas and issues around CCS technology. The workshop will also shed light on CCUS-focused climate action strategies along with CCUS economic and business models with a view on Carbon market opportunities. To exchange valuable and actionable insights, the EAGE/ AAPG/ SEG CCUS Workshop 2025 will bring together the expertise from subsurface specialists including geologists, geophysicists, geochemists, wells' design and operations. reservoir engineers, project managers, and petrophysicists, as well as research and academia.
