GENERAL INFORMATION

EAGE

The European Association of Geoscientists and Engineers (EAGE) is a global professional, non-profit association for geoscientists and engineers with 19,000 members worldwide. The objective is to collect and distribute technical knowledge. EAGE organizes events and publishes a monthly magazine for its members and 5 scientific journals. All members of EAGE are professionally involved in (or studying) geophysics, petroleum exploration, geology, reservoir engineering, mining and mineral exploration, civil engineering, tunneling and environmental matters. EAGE's head office is located in the Netherlands with regional offices in Moscow, Dubai, Kuala Lumpur and Bogota.

AAPG

Since its founding in 1917, the American Association of Petroleum Geologists has been a pillar of the worldwide scientific community. The original purpose of AAPG, to foster scientific research, to advance the science of geology, to promote technology, and to inspire high professional conduct, still guides the Association today. AAPG provides publications, conferences, and educational opportunities to geoscientists and disseminates the most current geological information available to the general public. As the world's premier professional association for explorationists, AAPG is about the science of petroleum geology. AAPG's membership is made up of about 40,000 members in 129 countries in the upstream energy industry who collaborate – and compete – to provide the means for humankind to thrive.

ABOUT THE WORKSHOP

Tight reservoirs have become a very important resource that most oil operators are headed towards, to sustain the supply of hydrocarbons resources; Where there are many unique and specific challenges associated with all exploration and production aspects.

The need to optimize the production capacity and recovery potential from this type of reservoirs have risen. Unconventional resources, including tight reservoirs, constitute some of the largest components of remaining hydrocarbon resources in the Middle East reservoirs.

The fifth edition of EAGE/AAPG Tight Reservoirs Workshop in the region will highlight case studies and new ideas from industry and academia in the Middle East and worldwide where a multitude of topics will be discussed from both the exploration and production side including:

- Reservoir geology
- Petrophysics / rock physics / geomechanics
- Reservoir geophysics
- Reservoir engineering
- Integrated projects
- Tight fields economics

This EAGE/AAPG Tight Reservoirs Workshop aims to promote discussions related to tight reservoirs based on both local and international experiences.
