GENERAL INFORMATION

EAGE

The European Association of Geoscientists and Engineers (EAGE) is a global professional, non-profit association for geoscientists and engineers with 19.000 members worldwide. The objective is to collect and distribute technical knowledge. EAGE organizes events and publishes a monthly magazine for its members and 5 scientific journals. All members of EAGE are professionally involved in (or studying) geophysics, petroleum exploration, geology, reservoir engineering, mining and mineral exploration, civil engineering, tunneling and environmental matters. EAGE's head office is located in the Netherlands with regional offices in Dubai, Kuala Lumpur and Bogota.

SUT

The Society for Underwater Technology is a multi-disciplinary learned society that brings together organizations and individuals with common interests in underwater technology, ocean science, and offshore engineering. SUT was founded in 1966 and has members from more than 30 countries including engineers, scientists, other professionals and students working in these areas.

Its main purpose is to promote the further understanding of the underwater environment and to encourage discussion and dissemination of ideas, experience and information between workers in academic research, applied research and technology, industry and government development of techniques and tools to explore and study oceans, proper economic and sociological use of our resources in and beneath the oceans, further education of scientists and technologists to maintain high standards in marine science and technology.

ABOUT THE WORKSHOP

Offshore renewable energy is a pivotal element in the energy transition, featuring global advancements from near-shore shallow water areas to deep-sea environments. These areas often exhibit a complex geological history, leading to distinct geospatial variability in soil conditions with potential geohazards. Also metocean conditions vary massively between regions. Effective development optimization (foundation concepts) and geohazard management necessitate the comprehensive integration of geological, geophysical, geotechnical and environmental data within a robust (geological) framework, encompassing uncertainties in a holistic manner.

Recognizing the importance of bridging the gap and enhancing understanding between geotechnical and geoscience communities, the European Association of Geoscientists & Engineers (EAGE) and the Society for Underwater Technology (SUT) are planning a series of workshops in different parts of the world. These workshops address globally applicable themes which are tailored to region-specific considerations, serving as a unique technical platform to tackle challenges and progress towards genuinely integrated site characterization and foundation design.

The global workshop series aims to champion and advance a multi- disciplinary approach as the standard for sustainable future offshore renewable energy site characterization and infrastructure development.

EAGE/SUT will solicit abstracts from industry and academia experts to develop a program of technical presentations and panel discussions addressing the pressing regional challenges for offshore renewable energy development in the US

SPONSORING OPPORTUNITIES

With an array of unique promotional opportunities, we can help you design the perfect programme to enhance your company's experience at First EAGE/SUT Workshop on Integrated Site Characterization for Offshore Renewable Energy. The Main Sponsor Programme exposes attendees and businesses to your company and promotes your presence within the industry.

EAGE strives to realize recognition, long term exposure, benefits and publicity for companies that sponsor EAGE workshops.

WHY BECOME A SPONSOR

When you are a corporate sponsor you get high visibility in a qualitative and uncluttered environment that makes your message stand out. EAGE is synonymous with quality, with proven track records in the past. The workshop programme offers a diverse menu that will help you reach your target audience.

Sponsoring will enable you to:

- Increase your visibility to a national, regional and international audience
- Enhance your corporate image
- Reach an influential and exclusive audience
- Break through the media clutter
- Associate your company with EAGE – World's truly multi-disciplinary geosciences society

Please note that sponsoring opportunities are not restricted to packages in this guide. We would be delighted to explore ideas to fit your budget.
